

Retaining Employees With SPIDER

Investing in a SPIDER means protecting your business from today's labor shortage crisis so you can rest assured the job will get done:

An All-in-One Solution: Eliminate the need for your employees to transport and use multiple pieces of equipment – mow everything from short park grass to extremely tough terrain, steep slopes, heavy brush and even standing water.

Reduce Strenuous Working Conditions: Avoid the time-consuming and expensive cycle of employee turnover by alleviating landscaping challenges caused by obsolete technology so you can better retain valuable team members.

Significantly Increased Productivity: Work your landscapers smarter, not harder – complete 2+ acres in just one hour with the SPIDER 2SGS EFI, saving precious labor hours and reducing employee burnout.

Ease of Operator Use On Steep Slopes: Remove frustration and struggle for your landscapes so they can easily maintain slopes of up to 60 degrees – no other mower can safely tackle these angles without harming the terrain or the operator in the process.

Fewer Operators Required: Resolve labor shortage issues – one SPIDER mower performs as efficiently as up to 16 workers with brush cutters and one boom mower carried by a tractor.

Decreased Long-Term Costs: Increased efficiencies amongst your laborers result in long-term cost savings that'll help you see a high return on investment in no time. On average, our customers reach their ROI in about one year.
